Kristy Luck: Transformer
Philip Martin Gallery, 2712 South La Cienega Boulevard
11 January–22 February 2020

Fluid forms and colours across the canvases of Kristy Luck make up Transformer, where viewers' associations roam free. Interspersed throughout this abstraction are motifs ranging from 'erupting volcanoes, bursting blooms, and spinning tornadoes', signalling states of transformation that Luck has referred to as creative processes of finding 'a visual language for personal melancholia and intuition' rooted in feminine experience.
